Dynamic analysis

Pressure plate Presscam V5
AMPRESSCAM5-0

Dimensions (width/length)	550 x 661 mm
Active surface area	400 x 400 mm
Base	9 mm thick
Weight	3 kg
	1 year guarantee

Presscam V5 is a hybrid pressure-posturology platform that complies with Directive 93/42/EEC and is certified by DEKRA.

It is powered via a USB cable connected to a computer.

Presscam performs several functions:

- Clinical examination report with statistical processing
- Acquisition of plantar pressure data in static, multi-footstep dynamic and dynamic video modes
- 100Hz scan compared to certain platforms below 40 Hz
- Posturological examination
- Movement of pressure centres (PCs) over a given time
- LAMFI read-out
- Option to reposition the horizontal line during analysis to define high and low zones for use with the "analysis by zone" tool
- Compatible with MEDI + 4000 and PODOEVOLUTION software: patient information, data acquisition, graphics, videos, etc.

New

Compatible with INTELISOLE®-MP
(see pages 3 - 4)
MEDI+4000 and PODO-EVOLUTION.
