

OPCT® City Man

This orthotic offers the best combination of comfort and thinness. With its narrow pattern and leather-effect top layer, it is perfectly suited to street shoes. The expertene at the forefoot and the Podiane®+ at the heel provide maximum protection in street shoes, which often provide little cushioning.

OPCT® City Lady

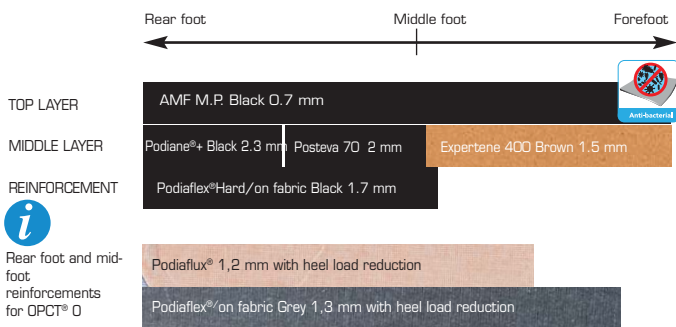

This orthotic offers the best combination of comfort and thinness. With its narrow pattern and leather-effect top layer, it is perfectly suited to street shoes. The 1.5 mm expertene at the forefoot protects the metatarsal head area which is subjected to a lot of pressure, particularly in high-heeled shoes.

OPCT® Sever

Sever's disease is one of the most common growth pathologies in physically active children. The structuring of the materials making up this orthotic has been developed specifically for Sever's disease:

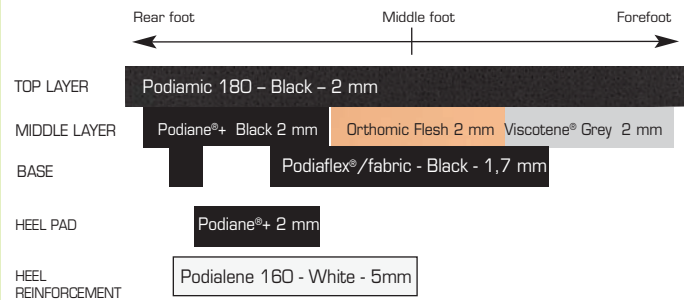

- 1/ Stabilisation of painful calcaneus
- 2/ Heel off-loading
- 3/ Distribution of plantar pressure
- 4/ Use of resistant and durable materials suitable for sporting activity.

OPCT® SEVER orthotic approved by UFSP podiatrists.

OPCT® Indoor

Developed in partnership with the French National Institute of Sport and Physical Education, this orthotic is designed specifically for indoor sports such as basketball, handball and volleyball. The materials used and construction are designed to optimise sports performance while limiting the possibility of injury: Viscotene for increased propulsion, a complex of resins for improved foot support, optimum cushioning with Podiane®+ to limit the chance of injury and the use of resistant materials appropriate to the demands of each sport.

OPCT® Rugby/Soccer

For rugby and soccer shoes.

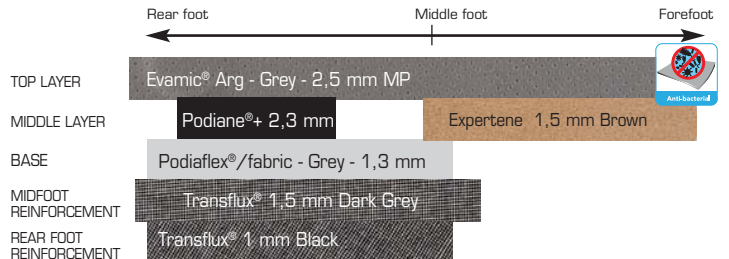

A thin orthotic featuring a forefoot pad that protects the stud zone. Special reinforcements guide the foot during the acceleration and change-of-direction phases. At the rear foot a Podiane®+ pad provides optimum shock absorption during braking and landing phases on hard surfaces.

Endorsed by **Jonathan Draper**.
"Member of the British Chiropody and Podiatry Association, currently works with a range of professional sports clubs, including Premiership and Championship Football Clubs, Super League Rugby and County Cricket teams."
